Transforming business.

Learning, remote collaboration, storytelling. Our partners have moved beyond proofs of concept and have put HoloLens to use in real business scenarios.

Defining the future of car discovery.

Volvo Cars is renowned for safety, design and its Swedish vision of luxury. Volvo puts people at the center of everything it does. From giving customers a sensor's vantage point to configuring cars in entirely new ways, Microsoft HoloLens brings its cutting edge car features to life in ways never before possible.

See into the future of product design.

Microsoft HoloLens and Autodesk Fusion 360 are helping improve collaboration across the entire product development process, enabling engineers and designers to iterate together in real-time. Faster prototyping, more confident decisions, and more efficient cooperation are the future of product design.

Transforming design and construction.

Trimble's groundbreaking innovations help architecture and construction industry professionals do their jobs better. See how Microsoft HoloLens extends Trimble tools, bringing 3D models to life as full-scale holograms and creating new ways to communicate and collaborate with remote teams across the globe.

Explore new places and ways to work.

Scientists at NASA's Jet Propulsion Laboratory will soon be exploring Mars using holograms of Mars Rover images. They will work as if they can walk on the surface of Mars, an experience previously impossible. As a result, they will be able to learn at a faster pace than ever before.
